UNITY 100 Stereo Power Amplifier – fast, accurate, powerful

The solidly-built but compact **UNITY 100** is engineered to combine power with grace.

As a result, this remarkably capable amplifier conveys musical performances a very natural-sounding way.

Convincing and involving playback is delivered with even the most demanding loudspeaker loads.

Multi-transistor class AB design with no overall feedback. Regulated supplies for input and driver stages. Unusual high-current, high accuracy “pure unity buffer” output stage.

All aluminium construction with ½ inch thick anodised aluminium front panel.

Enormous reserves of power from 780VA toroidal transformer.

Output power: 100W per channel into 8 ohms, 200W per channel into 4 ohms

WBT touchproof loudspeaker terminals.

Bandwidth: 20Hz to 20kHz +/- 0.1dB (100kHz -0.5dB)

THD: less than 0.1% 1W to 100W into 8 ohms. 1% at 128W into 8 ohms

Supply voltage: 230V, 50Hz (other voltages available as factory option).

Front panel: power on/off rocker switch, LED indicator

Rear panel: 2 x RCA phono inputs, 2 x XLR inputs, input ground lift switch,
4 pairs WBT touchproof loudspeaker terminals

Dimensions: W 455mm x D 350mm x H 120mm Weight: 16kg
